**Time: 13:30 p.m. - 4:30 p.m. (duration: 3hrs)**

**Proposed Venue: Conference Hall of MINTP, Cameroon, Hybrid Format (In-Person and Online)**

## 1. Project Overview

The Government of the Republic of Cameroon plans to reconstruct the Douala - Yaounde - Bertoua - Garoua Boulai section of the Douala - Bangui corridor with support from several Technical and Financial Partners (TFPs), including the WB, the IsDB, the AFD, the EU and the EIB. The purpose of the project is to enhance the functionality of the Douala - Bangui Corridor. Its development is expected to generate economic benefits by reducing vehicle operating costs and increasing the number of trips thanks to shorter journey times. Furthermore, the project aims to open up the region or localities it serves, improve the living conditions of the populations of the said localities while promoting economic development at local and regional levels. The programme is due to be implemented by the Ministry of Public Works, the Project Owner. The related workshop will focus on Phase 1 of the programme, which includes: (i) rehabilitation of the road infrastructure and improvement of road safety along the Dibamba Bridge - Yaounde section, including the construction of a bridge over the Dibamba River; (ii) construction of two high-performance weighing stations in Mbankomo and Edea; (iii) control and supervision of the related works; and (iv) establishment of a sustainable maintenance mechanism for the Yaounde - Bonis - Bertoua - Garoua-Boulai section of the corridor, alongside the execution of reinforcement maintenance works on the most damaged stretches. Moreover, technical studies for the Yaounde - Bonis - Bertoua - Garoua-Boulai road will be conducted.

## 2. Eligibility

Public works companies, control and supervision firms, other stakeholders in the transport infrastructure sector, concessionaires, transporters' unions and professional associations within the transport sector are hereby invited to participate.

## 3. Conditions for Participation

Organisations and individuals interested in participating are hereby invited to express their interest by requesting additional information at the following email address: corridordoualabangui@cpr-fc.cm

Upon expression of interest, participants will receive a link to the participation platform, a detailed project description and the registration link.

## 4. Disclaimer

This consultation is a discussion session intended for information sharing and the gathering of industry feedback; it does not mark the official commencement of the contract award procedure. Participation in this preliminary market consultation does not grant any advantage in the selection process. This is neither a Call for Tenders, nor a pre-selection procedure. All information received will be processed with strict confidentiality and used solely for the purpose of the contract evaluation.
